AMENDMENT AND RESPONSE TO OFFICE COMMUNICATION

Commissioner for Patents
Washington, D.C. 20231
Dear Sir:

This is in response to the October 31, 2002 Office Communication Action.

Applicants elect, with traverse, as set forth previously in the August 21, 2002

Amendment, incorporated herein by reference, the invention of Group I, the species bovine, a first antigen of P21, a second antigen of Cp 15/60, and presentation of the composition in antigen form (i.e. vectors are not elected).

The Office Communication and the previous Office Action assumed that the first and second enteric pathogens of claim 1 were different, when, in fact, as shown by claim 30, the first and second enteric pathogens can be the same enteric pathogen; namely, *Cryptosporidium parvum*.

Thus, it seems that the previous election was fully responsive to the previous Office Action, and the claim 1 is amended herewith to clarify this issue.
